## Winter Roadway Maintenance- Snow/Ice Procedures

### Beginning of the storm-

- trucks are loaded with salt
- trucks are sent out for a salt round (salt every blacktop road)  
(Gravel rds. gets anti-skid stone)
- if snow continues, plow blades are installed and trucks go out to provide clearance for emergency vehicles - two plow width's, except in cud-e-sac's one plow width - salting and plowing.
- continues as many times as needed, every 3-5 inches, till storm starts slowing down or stops
- during a **White-out conditions** trucks will be out for fire/medical emergencies only for safety reasons
- **when storm ends** – snow will be plowed back to the curb if and/or white lines if possible. Roadways in housing developments will be plowed to the curb.
- Deicing salt will be applied during last pass when plowing if needed.
